Introduction

Purpose of Document

The purpose of this document is to assist the project team in identifying the learning requirements and paths to enable the project team members to successfully fulfill their role on the project. The requirements cover learning of products, tools, technical and functional content, project management and people skills.

Overview

This document includes the following components:

Components	Description
Introduction	Shows the outline for the work session.
Project Team Learning Scope	Details the learning needs and paths by role on the project team, including the measurement methods selected.
Administration of Project Team Learning Materials/Events	Inventories learning events and required materials, schedule and special consideration for customization.

Project Team Learning Scope

Project Team Learning Needs

The following table captures the gap between required and existing skills for each project team member, by role.

Name of Project Team Members	Role	Required Skills	Existing Skills	Gap = Learning Needs

Individual Learning Paths for Project Team

The following documents the sequence of learning activities for each project team member, by role.

Name of Team Members	Role	Preparation Activities		Knowledge and Skills Acquisition		Skills Transfer and Reinforcement	
		Delivery Method	Key Content to Cover	Delivery Method	Key Content to Cover	Delivery Method	Key Content to Cover

Measurement Methods

The first table of Project Team Learning Needs captured pre-learning data about the project team members and thus provide the first measurement data. By comparing the baseline data with data collected after learning, it is possible to determine how much learning has occurred.

The following measurement matrix, broken out by levels of measurement, has been designed for the project team learning.

- Reaction Measures
- Learning Measures
- Skills Transfer Measures
- Result Measures

In Kirkpatrick's four levels of evaluation, Learner Verification is a Level II evaluation, measuring learning; and Performance Assessment is a Level III evaluation, measuring behavior. Learning is defined as "the extent to which participants change attitudes, improve knowledge, and/or increase skill as a result of participating in the learning event." Behavior is defined as "the extent to which change in behavior has occurred because the learner participated in the learning event. Level III, then, describes learner behavior on the job; what learners actually do as a result of the learning event. Do they use their newly-acquired knowledge, skills, and attitudes in the desired manner when they return to their workplaces after the learning events.

Measurement Matrix ¹

The following table captures the type of measurements planned for each level of measurement.

Degree	I - Reaction	II - Learning	III - Skills Transfer	IV - Results
What we want to know				
What might be measured				
Measurement Dimensions

Administration of Project Team Learning Materials/Events

Inventory of Learning Events and Materials

The following inventories the events, their description and duration, and the corresponding materials, content and sources of learning event and/or materials.

Events	Description and Duration	Materials	Content, including Reusable Content Objects	Source: Contract resource, Organization	Contact

Schedule of Common Learning Events

The planned learning events will occur as follows.

Learning Event	Location/Address	Phone Number	Schedule	Preparation Required	Preparation Materials

The project contact will distribute the preparation materials to the attendee's work location at least one week in advance of the event.

Learning Agents for Project Team Learning Delivery

The following people will assist the conduct of learning events.

Learning Event	Learning Agents	Title	Address	Phone
	<Project Contact>			

Learning Event	Learning Agents	Title	Address	Phone

If changes or cancellations occur, the learning agents will communicate the changes to the attendees and other facilitators.

Special Considerations for Customization

The following documents the requirements for customization of learningware for the project team.

Learning Materials, e.g., Application Module	Content to be Added	Content to be Deleted	Duration	Audience Profile	Company Data Set Up

Other Considerations

The following are additional considerations for customization:

- ☐ Case Study _____
- ☐ Lab Exercises _____
- ☐ Actual Data _____
- ☐ Company _____
- ☐ Business Scenarios _____

Open and Closed Issues for this Deliverable

Appendix - Data Gathering Tool for Project Team Skills Inventory

The following table guides the gathering of skills data for the project team members.

Part One: Complete for all	
Name:	Role on the Project Team:
Phone Number:	Email Address:
Years with the <Company Long Name>:	Background:
List of applications used/supported:	
Involvement with a technology implementation: (If yes, describe product and role)	
Past experience that can assist in the implementation:	
Preferred learning methods: Rank in order of effectiveness - 1 to 5 with 5=high ___ Instructor-Led Training ___ Work Group ___ Hands-On Exercises ___ Self-Study ___ Work with Coach	

Part Two: If experience with Oracle products, complete Section 1, items 1 to 10. If experience with Oracle Applications, complete Section 2, items 11 to 51. If experience using Project Management tools, complete Section 3, items 52 to 55.				
#	Products	Frequency of use (1 = never and 5 = daily)	Proficiency Level (1 = no experience, 5 = expert)	Comments

SECTION 1 - Experience with Oracle Products				
1.	Designer			
2.	Developer			
3.	Discoverer			
4.	Forms			
5.	Graphics			
6.	Parallel Server			
7.	PL/SQL			
8.	Procedure Builder			
9.	Reports			
10.	Web Application Server			
SECTION 2 - Experience with Oracle Applications				
1.	Account Payables			
2.	Account Receivables			
3.	AOL			
4.	Application for the Web			
5.	Applications Data Warehouse			
6.	Bills of Material			
7.	Business Agents (Alert)			
8.	Capacity			
9.	Cash Management			
10.	Cost Management			
11.	EDI Gateway			
12.	Engineering			
13.	Financial Analyzer			
14.	Fixed Assets			
15.	GEMMS			
16.	General Ledger			
17.	Human Resources			
18.	Internet Commerce			
19.	Inventory			

Part Two: If experience with Oracle products, complete Section 1, items 1 to 10. If experience with Oracle Applications, complete Section 2, items 11 to 51. If experience using Project Management tools, complete Section 3, items 52 to 55.

#	Products	Frequency of use (1 = never and 5 = daily)	Proficiency Level (1 = no experience, 5 = expert)	Comments
SECTION 1 - Experience with Oracle Products				
20.	Master Scheduling/MRP			
21.	OLAP			
22.	Order Entry			
23.	Payroll			
24.	Personal Time & Expense			
25.	Product Configurator			
26.	Project Billing			
27.	Project Costing			
28.	Project Manufacturing			
29.	Purchasing			
30.	Quality			
31.	Sales Analyzer			
32.	Sales and Marketing			
33.	Sales Compensation			
34.	Service			
35.	Supplier Scheduling			
36.	Supply Chain Planning			
37.	Training Administration			
38.	Tutor			
39.	Work in Process			
40.	Workflow			
41.	Other:.....			
SECTION 3 - Experience with Project Management tools				
1.	AIM			
2.	Microsoft Project			
3.	Project Workbench			
4.	Other project tools:.....
