Introduction

Purpose

Early in the systems implementation process, we evaluated the organization's change readiness, user learning and communications needs. At that time, we gathered baseline information which allowed us to tailor initiatives for the specific needs of <Company Long Name>. Now that the implementation is complete, our goal is to measure against that baseline and create plans to move the organization forward. In this Effectiveness assessment activity, we evaluate business and system performance, organizational effectiveness, performance transition, communications, and learning needs.

The purpose of this document is to capture key findings and recommendations toward the implementation of continuous improvement measures such as:

- Business performance: measures and captures the performance of the new system.
- A continuous improvement strategy: consists of insights, findings and recommendations based on an open systems model of organizational effectiveness.
- Performance transition decisions: tracks progress on key organizational decisions related to the transition to new performance levels.
- A communication strategy: suggests the approach for creating effective ongoing communications to all stakeholder groups.
- A learning strategy for end users: suggests a plan for addressing additional and ongoing learning needs among current and new users.

Overview

The following lists the components of this document:

Components	Description
Introduction	Shows the Agenda for the work session(s).
Executive Summary	Captures the high-impact findings and recommendations to optimize the organizational effectiveness and system performance.
Business Performance Metrics	Reviews the organization's effectiveness with its new systems.
Assessment Process	Describes the approach followed to develop this second roadmap.
Organizational Performance Strategy	Highlights the key findings and recommendations related to the organizational effectiveness, as per the congruency model of organizational systems. Position the findings and recommendations per stakeholder groups when appropriate.
Performance Transition Decisions	Reviews the decisions made in the transition of the project to the organization's operations to make sure there is congruence and relevance to the effectiveness of the organization.
Communication Strategy	Describes the approach for creating effective communications to all stakeholder groups on an ongoing basis. Specifies the communication structure, objectives, roles and other components of the communication strategy on the basis of the relevant findings and recommendations.
Learning Strategy for Users	Describes a high-level plan for leveraging the current capabilities of the organization and analyzing the organization's ongoing learning needs. Lists the learning objectives, the types of users who will be the target groups of learners, and organize findings and recommendations around learning options, content, reinforcement, measurement and overall capabilities
Appendix A	List of Respondents by Group
Appendix B	Interview, Focus Groups and Survey Questions per Group of Respondents
Appendix C	Consolidated Insights per Group of Respondents

Session(s) Overview

Purpose

Now the implementation project is over and the organization is looking into ways to facilitate performance results and explore continuous improvement opportunities. The Effectiveness Assessment work session assembled key members of the executive team and key leaders to review the strategies deployed in the implementation project and identify those that can help move the organization forward and pursue continuous organizational improvement.

Work session participants were gathered to convert the assessment findings into effective recommendations compatible with their culture and their budget. The recommendations are accompanied by an action plan which includes the person who is responsible, the anticipated date of completion, and the milestones and measures associated with the action.

The work session was highly interactive and focuses on decision making around key questions to make sure that the organization can continue to improve and realize the full business benefits it targets:

- Which organizational strategies deployed in the implementation were most successful? For example, penetration and cascade strategy for communications, delegation patterns, ...
- Which organizational strategies deployed in the implementation were least successful? For example, insufficient learning events, roles still not clear, re-organization not accepted yet.
- Have we achieved the business results we anticipated? If not, what do we need to do?
- Are we taking full advantage of our new technology? If not, what can we do to improve our use of our systems?
- How well do our people understand our vision for the future? Do they believe in it? Are they committed to it?
- How effective are our communications?
- How effective is our new organization of roles, business processes, etc.?
- What additional learning do our people need? What do we need to do differently?
- How aligned are our systems?
- How ready are our people for the next change?
- How has our culture changed? How does it need to change?

The work session reviewed the findings around these questions and helped explore the best course of action in each of the key areas. Recommendations address how continuous improvement should be facilitated, communication leveraged, risks mitigated, learning and post-implementation support made available.

Facilitation

The work session was facilitated by <Facilitator Name> from

<Facilitator Name> Biographical Notes:

In addition, <Scribe's Name> attended the session to keep a record of all decisions made during the meeting and keep deliverables updated at all times throughout the session.

Attendees

The following people attended the work session:

Organization	Name of Attendees	Title
<Company Long Name>		

Organization	Name of Attendees	Title
Contract resources		

Outline

The following lists the activities conducted for the work session:

Sections	Description	Time	Duration
Introduction	Overview of the session: purpose, expectations, logistics, etc.		½ hour
Review Background Information - Review the Open System Organizational Model - Describe the characteristics of effective recommendations	Sets the stage for the understanding of the findings and the creation of recommendations by positioning the Open Systems Model as the basis for organizational effectiveness.		½ hour
Review Key Findings - Highlight key results - Build consensus around priorities	Highlights the key results and diagnostic from the assessment. As appropriate, compare to the benchmarks gathered in the Project Readiness Roadmap (AP.070)		1 ½ hours
Co-Develop Recommendations - Review typical interventions which may impact continuous improvement - Brainstorm an initial list of organization recommendations tied to findings - Select criteria for evaluation - Evaluate the recommendations - Prioritize the selected recommendations	Guides the organization on co-developing in a highly interactive format recommendations that are clear, specific and practical, are innovative and interesting, are within budget, are compatible with the organization's culture, stand a good chance of making the organization more effective, and more importantly, that generate buy-in.		3 ½ hours
Develop an Action Plan - List tasks steps - Assign accountability - Determine timeframe - Determine necessary resources - Establish measures and milestones to track progress - Add communication items - Convert into an action plan	Identifies the details around implementing the recommendations.		1 ½ hours

Sections	Description	Time	Duration

Assessment Process

Assessment Approach

The Effectiveness Assessment resulted from an organizational assessment that evaluated the organization's effectiveness after a major technology-induced change. For the organization to function well as a whole, the various parts must be both consistent with and support each other, maintaining alignment. Organizational effectiveness is determined by this *relationship* between parts rather than any inherent characteristic of an individual component. To achieve this relationship of congruence, altering any area, such as business processes and technological systems, required an overall re-evaluation of the organizational effectiveness, carefully designed to bring the parts into alignment. What is important is to address the organization as a whole and the dynamics between its interacting areas. In this Effectiveness Assessment, we looked at the organization's alignment and opportunities for improved effectiveness. The information gathered through this assessment served as a second measurement which was compared to the benchmarks established in the Project Readiness Roadmap (AP.070). Finally, the assessment itself was a mechanism for getting people involved in the decisions around organizational effectiveness and was also be used as a step in disseminating information

Open Systems' Organizational Model

The model used to analyze the impact of the technology implementation -- that might include new/improved business processes -- on the organization was derived from the open systems theory of organizations, adapted from the congruence model.

Organizations as Interrelated and Interdependent Systems

Contemporary organizational theories integrate the various elements that contribute to the whole organization. The underlying theme is that of systems; organizations are seen as systems of mutually interrelated and interdependent sub-units. Actions occurring in one area not only affect that particular unit, but are likely to have a ripple effect throughout all the subsystems of the organization. The implication of this being, therefore, that events do not simply happen, but rather evolve from multiple pressures and can provoke multiple outcomes.

Five Main Systems of an Organization

The strategy sets the template for the inner-workings of the organization, consisting of five main systems: work, people, organizational structure, organizational culture, and physical layout. Optimally these five systems reinforce each other, creating a consistent message throughout the organization. This congruence, or lack thereof, is then transformed to outcomes on the organizational, group, and individual level. On the organizational level we can measure this through ROI, growth, revenue and profit. On the group level this is reflected in the ability of the various groups to function as a unit. Feeding into the groups, yet with a separate dynamic are individuals, who can experience both personal and job related growth, measured by behavior on the job. All three processes, system, group, and individual, provide feedback to both the organization's inner workings and context, affecting strategy and relations between the five areas.¹ The order in which they are presented is random and not intended to imply any sort of ranking or linear order.

Work

One of the five systems is *work*. In general this area refers to the basic tasks of the organization, those elements that relate specifically to the work itself. It includes, for example, work flow and role interdependencies, task planning, technical requirements, productivity metrics, procedures, and task-related learning.

People

The second, *people*, refers to both the characteristics of the individuals involved, what each person contributes to interactions and processes, and the ways in which organizational practices affect them. These include human resource (HR) practices (what actually occurs rather than the policy), leadership, individual demographics and experience, individual perceptions and expectations, needs and preferences, skills and knowledge, and competencies

Organizational Structure

A third area is *organizational structure*. Structure consists of the formal processes and methods designed to permit individuals to perform tasks. It includes information channels, decision-making processes, organizational layers and hierarchy, mechanisms for coordination and control, business processes, departmentalization, human resources (HR) systems, systems of reward, and policies related to ethics, budget and the like.

¹ The five areas are by no means presented here as the unique view of the inner organization. Many different models exist, each has its own advantages and disadvantages. The model here has been adapted as the best fit with our view of organizations.

Organizational Culture

Fourth is *organizational culture*. Culture refers to the emerging relations of the organization, interpretations of life in the organization, and the meanings that flow from them. Included are the subcultural norms and values, relations both within and between groups, conflict management, patterns of communication and influence, informal networks, organizational style and climate, and non-formalized sources of power.

Physical Setting

The final system is *physical setting*. Physical setting includes location, the physical properties of the building, furniture and equipment, the quality of lighting and air, amenities such as cafeterias and parking, and considerations of safety and access.

Components of Five Systems

The following table lists the facets included in each of the five systems:

Systems	Facets	Description
Work: Relating to the task itself	Work Flow/Role Interdependencies	The ways in which one job, or its outputs, leads to the next; the interdependence between jobs related to the structure of the task.
	Role Requirements	Skills needed and demands required by a particular task, job design, routineness, performance demands to meet strategy
	Planning/Goal Setting	Expectations of the task in meeting production goals
	Technical Requirements: Hardware/Software	Technological tools used for specific task requirements
	Metrics (that is, Productivity Indices)	Measures of productivity and task goal attainment; output measures
	Procedures	The way tasks are accomplished; the methods used to create a specific output
	Learning	Method by which employees new to the department or job are taught the task role and specifics
People	Human Resource (HR) Practices/Orientation	How HR policies “perceive” people, are actually policies practiced, and the effects on employees
	Leadership	Formal and informal leaders; the qualities which promote being listened to, managerial style, leader behavior
	Demographics	Unchangeable factors about an individual which may affect the way they approach the world, for example, cultural or ethnic identity, gender, age, socio-economic background
	Experiential Background	Individual experiences which may affect behavior, that is, work experience, personal lifestyle
	Perceptions and Expectations	Individual sensemaking and interpretation of what did and does exist leading to expectation of what should happen in the future, sense (or lack) of organizational effectiveness, trust
	Needs and Preferences	Psychological needs and preferences of the individual; fulfilling these is motivating on an individual level, commitment
	Skills/Knowledge	Skills and knowledge of the individuals

Systems	Facets	Description
	Competencies	Abilities and the capacity to follow through on them, personal growth
Organizational Structure	Informational Channels	Routes inherent in the structure by which information is able to flow
	Decision-making Process	Accountability for decisions, channels of approval, institutionalized procedures for making decisions, consensual, autocratic or by vote
	Organizational Layers and Hierarchy	Vertical levels on the organizational chart, reporting relationships, distribution of formal authority
	Coordination and Control Mechanisms	Formal cross-departmental communication and planning; written goals and production quotas
	Business Processes	Complete response that a business makes to an event; entails the execution of one or more process steps; has a clearly defined deliverable or outcome
	Departmentalization	Formal division of labor, division into area responsibilities
	Human Resource (HR) Management Systems	Systems in place for the purpose of managing HR, written HR policies and procedures, channels designed to deal with recruitment, hiring, firing, job evaluations, assessment of employee morale, resolution of personal conflict
	Reward Systems	Compensation programs, promotion systems, bonus programs, reinforcement, perquisites
	Policies: ethics, issue resolution, grievance, budget	Written policies addressing issues of business ethics, resolution of conflict (non-personal), grievance channels and procedures, issues of budgetary policy, fiscal responsibilities and priorities
Organizational Culture	Subcultures: Norms/Values	What behavior is expected and accepted in subunits of and across the <Company Long Name>, apparent shared values underlying behavior, bases of subcultures (that is, function, hierarchy level, ethnicity, gender, race)
	Inter- and Intra-group Relations	Relations between people both within their own groups and between groups, boundary spanners, social interaction on and off the job, team functioning, subordinate attitude towards management, meeting and group processes
	Conflict Management	Informal conflict resolution (personal), level of conflict considered appropriate
	Communication and Influence Patterns	Amount and ease of communication both within and between groups, use of information as source of influence or power, use of gatherings to address organization issues, political bartering, use of outsiders to influence
	Informal Networks	Relationships between individuals not related to job function, "the grapevine"
	Style and Climate	"Feel" of the organization, general work atmosphere, formal vs. Informal, individual vs. Team, participative vs. Directive, impersonal vs. Warm, competitive vs. Collaborative
	Non-formalized Sources Of Power	Uses of personal power, control of data and information, access to resources, leader of informal subculture

Systems	Facets	Description
Physical Setting	Location	Where the organization is located; city or rural, downtown, industrial or suburban district
	Building	Physical layout of the building; open spaces, closed-in offices, distribution of work spaces, departments' physical relation to each other, physical condition of the building
	Furniture	Adaptation of furniture to work needs, comfort, ergonomics, aesthetics
	Equipment	Availability and ease of access to needed tools, condition of equipment
	Lighting	Type and amount of lighting both for reduced eyestrain and ambiance
	Air	Quality of air, fresh or recycled, temperature, scent
	Cafeteria	Existence of on-site nourishment, quality and price of available food, seating arrangements, conduciveness to pleasant "downtime"
	Parking	Availability of on-site parking, distance to workplace, covered or open, covered walkway to workplace, cost, lighting after dark
	Safety	Safety concerns addressed, emergency plans in place, communication of emergency plan to all levels, existence of security during and after normal work hours, Occupational Safety and Health Agency (OSHA) guidelines understood and in practice, protective clothing and accessories when applicable
	Access	Location of building accessible to workforce, building entrance/exit accessible, distance from air and other public transportation
	Virtual Setting	Space where home office work occurs, including availability of connectors, speed of connection, etc.

Assessment Topics

Through a combination of data gathering techniques, for example, interviews, focus groups, survey, the Effectiveness Assessment focused on key topics for organizational effectiveness and ongoing performance improvement:

Assessment Areas	Topics
Organizational Effectiveness	• People • Work • Organizational Structure • Physical Setting • Organizational Culture
Performance Transition Decisions	• Business Results Realized vs. Expected • Transition strategies • Contingency Plans
Communication Requirements	• Communication Strategies
Learning Requirements	• Learning results and additional requirements

Assessment Process

To provide a quality product, the Effectiveness Assessment followed a structured methodology.

Stakeholder Groups

In so far as possible, we used the same target population as we used for the Project Readiness Roadmap (AP.070) for comparison basis.

Stakeholders are those people who have a vested interest in the effectiveness assessment and are the primary targets for the assessment because, ultimately, their ability and willingness to meet the new performance expectations will determine whether or not the anticipated business results are obtained. The validated Stakeholder Matrix which appears below was used to identify the groups targeted for the assessment.

Respondent Sampling

Based upon the above stakeholder information, a sample population was selected to participate in the assessment process. To obtain a representative sample of the total target population, various sampling techniques were used including purposeful selection, and stratified random selection. The assessment sample population that participated in the assessment is shown in the table below.

Population Groups	Impact	Population Numbers	Actual Sample Numbers	Sampling Method	Data Gathering Method	Number
Key Users						

Population Groups	Impact	Population Numbers	Actual Sample Numbers	Sampling Method	Data Gathering Method	Number
Total Key Users						
Other Users						
Total Other Users						
Other Stakeholders						
Total Other Stakeholders						
Total Population Sample						

Constraints

The following constraints were addressed as described:

Description of Constraint	How it Was Addressed

Roles

The following people were involved as described under roles, to lead, guide, assist and otherwise participate in the assessment process. The list of respondents can be found in Appendix A.

Role	Responsibility
<Company Long Name> executive sponsor • <Name>	- Ensures resources are available for the assessment at all involved sites - Manages external risks to the assessment - Signs or arranges for introduction of the assessment to the organization - Makes, or makes sure, that others make timely decisions - Communicates the vision of the project and the role of the assessment in its success
<Company Long Name> Project manager • <Name>	- Selects assessment agents - Communicates and coordinates with managers outside the assessment team - Identifies required subject matter specialists (SMSs) - Assign tasks to assessment agents - Monitors staff progress - Manages risks and escalated issues from assessment team - Direct issues to appropriate individuals for resolution - Signs on assessment tools and instruments - Coordinates the data collection process
<Company Long Name> Project coordinator • <Name>	- Responsible for day-to-day management of the assessment - Provides <Company Long Name> Project manager with general administrative support - Supports and distributes status reports

Role	Responsibility
<Company Long Name> Subject Matter Specialist (SMS)s/ Advisors • <Name> • <Name> • <Name>	• Act as spokespersons for their constituency, solicit and represent needs and environment of constituency • Guide, advise on, and/or validate key decisions • Represent key stakeholder constituencies • Facilitate use and leveraging of existing resources • Act as liaison to other related projects and functions • Communicate business and organizational needs in specific areas • Determine job functions for jobs impacted by technology • Responsible for providing timely and accurate information to be used during the assessment process
Assessment/ Organizational Development Specialists • <Name> • <Name>	• Provide organizational development, change readiness expertise • Conduct interviews or focus groups • Tailor and administer data-gathering tools • Evaluate data gathered in assessment • Document process and findings • Present assessment findings to project team • Co-develop and document recommendations for Project Readiness Roadmap (AP.070)

Data Gathering Techniques

Several approaches were used to make sure it is a comprehensive, valid assessment. The data gathering techniques used to gather information for this assessment included the following:

- Interviews
- Focus Groups
- Survey

We were always careful to avoid wasting time and energy through duplicated effort. Consequently, we structured our data gathering techniques to allow us to collect information for more than one purpose.

Interviews

We conducted one-on-one interviews with a sampling of the executive leadership team, the business unit leadership team, middle managers, first line managers, and users.

One-on-one interviews provided a richness and depth of information unavailable through any other means of data gathering. Consequently, we used this approach with those audiences who could provide the critical background information we needed in order to start assessing the organization's effectiveness.

We focused on such topics as:

- Perception of the effectiveness of the technology implementation
- Business results achieved so far
- The vision of the organization moving forward
- The alignment between organization, department and team visions
- The effectiveness of current leadership

- The effectiveness of communication strategies
- Cultural issues such as trust, teamwork, sociability, risk taking, and innovation, and customer focus
- Barriers to continuous improvement
- Organizational resilience
- Learning organization
- The gap between current skills and the skills need to move forward

In addition, we focus on the following topics per group of respondents:

Groups of Respondents	Topics
All	• Effectiveness of empowerment, decision making, communication, work environment, recognition and reward, leadership, trust, teamwork, customer focus, career planning, performance evaluation, measures, risk taking, innovation, vision, career development, job satisfaction, morale, system implementation, learning
Executive Team	• The vision moving forward, perceptions of the system implementation, evaluation of business results achieved, lessons learned, employee resilience, barriers to moving forward
Business unit managers	• Effectiveness of communication strategies, empowerment, performance measures, teamwork, barriers to moving forward, perception of system implementation, business results achieved, lessons learned
Middle managers	• Effectiveness of communication strategies, empowerment, performance measures, teamwork, barriers to moving forward, perception of system implementation, business results achieved, lessons learned,
First line managers	• Gaps between current and needed skills, effectiveness of learning approach, delivery methods, learning culture, learning effectiveness, clarity of roles, effectiveness of work procedures
Users	• Gaps between current and needed skills, effectiveness of learning approach, delivery methods, learning culture, learning effectiveness, clarity of roles, effectiveness of work procedures, barriers, rewards and performance measurement, work environment, tools, communication, problem solving, risk taking

Sampling Approach

Interview participants were selected because of their key positions in the organization, their ability to provide insights, their knowledge of the historical perspective, their vested interest in the success of the organization, or their formal or informal leadership role in the organization. The lists of people interviewed and of interview questions are included in Appendix A and B respectively.

Interview Data Compilation

The compilation approach for interview data occurred in two steps: Merge and Classify

- Merge: comments that were repeatedly made on the same subject from different respondents were grouped together
- Classify: the content of each group of comments was analyzed to determine the underlying issue

As we compile information gathered from interviews, we asked questions such as the following:

- Is this opinion based on subjective or objective data?
- Is this an isolated opinion or is it pervasive
- What is the interviewee's frame of reference?
- What is this interviewee's personal stake in this project?
- Are there common themes in these interviews?
- Are these comments influenced by personal relationships?
- Which issues have the most emotion attached to them?
- Are any of the issues interrelated?
- Are there any obvious priorities among the concerns expressed?
- Are there any areas of satisfaction upon which we can build?
- What inferences can be made about the interaction pattern among the respondents?
- What additional inferences can be made through observation of body language, tone, and general attitude?

Focus Groups

Focus groups consisted of a cross-sectional sample of people brought together to discuss issues related to the organizational resilience. Because multiple viewpoints were brought to the discussions, comments from one participant stimulated thinking in others and allowed the facilitator to collect large volumes of data in a short time. A structured agenda, cross-representation of participants, and an objective facilitator were critical factors that were present for a focus group to be successful.

During the weeks of ____ and ____ focus groups representing key stakeholder populations gathered to participate in focus groups to discuss the following issues:

- Use of the system in new roles
- Job satisfaction, employee morale
- Vision for the organization moving forward
- Opportunities, career development, career planning
- Empowerment, decision making, authority levels
- Performance evaluation; performance measures, performance expectations
- Communication patterns within the organization and communication preferences
- The culture of the organization, including such topics as: trust levels, risk taking, innovation, customer focus, and teamwork
- Leadership

The following focus groups were conducted: The detailed list of respondents and focus group questions are in Appendix A and B respectively.

Focus Group	Number of Attendees

Focus Group	Number of Attendees
Total:	

Survey

Surveys had the advantage of collecting large amounts of data in a reliable, inexpensive, timely manner. Survey questions focused primarily on the respondents' perception of various issues. A stratified random sample of the stakeholders in <Company Long Name> was selected to receive the validated Change Effectiveness Questionnaire. Our sampling strategy was designed to achieve a confidence level of 95% with a sampling error of plus or minus 3 percent. The topics, which map to the Open Systems Congruency Organizational Model, were as follows:

- People
- Work
- Organizational Structure
- Physical Setting
- Organizational Culture

A copy of this survey is also included in Appendix B.

Data Entry and Analysis

The data from the surveys was entered into the Oracle OCM Assessment Tool. The tool calculates the mean and the median as measures of central tendency, uses the range and the standard deviation as measures of spread, and also calculates a gap analysis for those items where we have used a double Likert scale (A double Likert scale consists of a statement such as "I trust my manager" followed by an "Agreement" scale and an "Importance" scale.). The tool has a robust analysis functionality which allow us to analyze the data by the demographics selected by the organization that is, by stakeholder groups, by location, by length of time with the corporation, and by the role of the respondent

Reporting Findings

Findings from Survey

The findings from survey were reported using the following table in the next sections:

Question/Item Related to Topic	Group	Mean	Median	Standard Deviation

Table Heading Definition

The following definitions assisted in the reporting of the finding tables:

Table Heading	Definition
Group	The group refers to the particular group of assessment participants that responded this way. Because the demographic data allows us to pull the data from various groups, we can report findings that show a contrast of opinion between groups or highlight a particular finding for a specific group.
Mean	The mean is the arithmetic average of all scores. It is calculated by adding all the scores together and then dividing by the total number of scores. Usually, it is the most meaningful statistic, but it is highly influenced by extreme scores (outliers), and as a result, a few extreme scores can pull the mean up or down..
Median	The median is the exact midpoint in any distribution, or the point that separates the upper half from the lower half. It is calculated by arranging scores in order of magnitude and then selecting the middle number in the sequence. When a distribution has outliers, the median is likely to be more typical of the majority of items in the distribution. The median is sensitive to the number of items with higher and lower values, but it is not sensitive to how much the values are higher or lower.
Standard Deviation	Standard Deviation measures how values are spread around a mean , in other words, whether they clump together or are widely spread. The average standard deviation on a seven point scale is about 1.5. A low score 1.0 or less indicates a high degree of consensus. At high standard deviation 1.8 or more indicates a wide diversity of opinion.

Organizational Effectiveness Strategy

Findings

The findings are reported using the framework of the Open Systems Model. This model describes the organization in terms of five major areas and defines effectiveness as the alignment and congruency of the systems within these areas. The assessment explored each area to provide leaders with the opportunity to look at the organization functional as a whole. The focus group discussions and survey questions focused on the stakeholders' perceptions of the organization's performance in each area, at the end of the implementation project. Quantitative responses to the survey items, representative comments made in focus group questions, and written survey comments are captured here.

Recommendations

Recommendations	Priority (1,2,3 where 1 is high)	Degree of difficulty (1-10 where 1 is easy)	Action	Accountability Assigned to	Measures and Milestones	Time Frame

Performance Transition Decisions

Decision Checkpoints

Prior to the completion of the technology implementation, transition decisions were made at multiple levels which were critical to the achievement of business results. Most of the decisions made should now be operational, but a few have been changed or simply lost. The following table provides a checkpoint where we revisited key decisions to make sure that nothing was neglected inadvertently and that these decisions were aligned with the decisions related to continuous improvement measures.

Decisions	Identified by:	Delegated To:	Time Frame for Completion	Perception Completed	Risk Associated with lack of follow Through
	Executive team				
	Steering committee				
	Project team				
	BU managers				
	Others				
				%	
				%	
				%

				%	

Recommendations

In addition to the decision documented above, the following recommendations are formulated:

Recommendations	Priority (1,2,3 where 1 is high)	Degree of difficulty (1-10 where 1 is easy)	Action	Accountability Assigned to	Measures and Milestones	Time Frame

Communication Strategy

Communication Update

The need for effective communications never goes away, and if the organization hopes to continue to reap the benefits of the change it has experienced and to move forward to achieve its new goals, the excellent practices around communication established during the implementation need to be preserved and enhanced. The update captured the feedback given on communications in the assessment activity. This is an essential step to creating motivation, sharing responsibilities and managing emotions in the new work environment

The Communication Strategy sustains people in the new environment and makes sure of effective dialogue and listening among the key players. Its approach helps manage the human side of the organizational effectiveness, in terms of achieving the performance objectives. Depending on the organizational culture and change history, the Communication Strategy will reach people through the leadership, political power, networking ability and technical expertise, emotional appeal or communication strength of the key players.

Objectives

The purpose of the Communication Strategy for continuous improvement is to establish the most effective infrastructure that will reach all stakeholders and keep them involved in the measures adopted. More specifically, at this point the communication strategy:

- reviewed the communication approach (for example, cascade, two-way, peripheral) deployed in the implementation to determine the strategies to keep in place and/or enhance
- specified the communication objectives to support the continuous improvement program
- highlighted the communication approach for all leaders
- defined the communication needs of each target groups.

Management Involvement

Leaders and managers play an important role in the acceptance and implementation of new ideas and methods. The formal and informal leaders act as role models. The way they communicate, or not, impacts the organizational performance. They need to begin communicating continuously and congruently. They also need to encourage on-going feedback from the stakeholders. The ability to listen and communicate is therefore certainly part of the organization's success.

Managers have access to many audiences both formally and informally. They give credibility when they use their personal and professional communication channels to broadcast of the project announcements. Managers create:

- mobilization and motivation by being in touch with people
- perception of trust and honesty with proactive and open communications

- buy-in through involvement

Stakeholder Involvement

The stakeholders are the ones who ultimately decide whether or not the system's full capability will be used. They have the power to either participate in or resist the process. Their involvement accordingly dictates whether or not the performance criteria will be achieved. The Communication Strategy addressed their concerns, their information needs, and is tuned to make sure they are involved.

Findings

The following captures key findings per question/item related to the communication strategy:

Question/Item Related to Topic	Strength	Area for Concern	Red Flag	Findings
Clarify of information				
Timeliness of information				
Honesty/accuracy				
Number of channels				
Two-way communication				
Cultural preferences				

Sample of Representative Comments

Recommendations

The following captures the recommendations and associated actions related to the communication strategy:

Recommendations	Priority (1,2,3 where 1 is high)	Degree of difficulty (1-10 where 1 is easy)	Action	Accountability Assigned to	Measures and Milestones	Time Frame

Learning Strategy for Users

Learning Evaluation

The purpose of the learning evaluation was twofold: to capture perceptions of the learning events deployed in the original plan, and identify the additional needs and gap between current and needed skills. The strategy for accomplishing those goals was to repeat the user learning needs analysis, using the same interview team to interview the same people and ask approximately the same questions.

Objectives

The objective of the Learning Strategy for Users was to determine how to address the learning needs still unmet, the additional developed for current and new users. The decisions fall into the following broad categories:

- How successful were the learning events?
- What learning options worked best?
- What reinforcement measures is working best?
- How effective is the post-learning support?
- Who needs additional learning? (by roles)
- What will the content of the additional learning be?
- How will the additional learning be delivered?
- Who will assist with the additional learning events

Types of Users

There are typically three types of users and one generic description for “users.” The description below clarified the use of the types in this section.

Types	Description
Power/Super Users	Likely to be computer literate and to expect “expert paths” or “shortcuts”; power users also expect more advanced technical system characteristics, such as fast response time and streamlined navigation.
Casual Users	Other end of the spectrum from the “Power users”: they expect a graphical, friendly interaction with the new system, built-in help and they may resist the shift to the new system.
Users	All groups of employees and management who interact with the system, to input data, analyze data and/or use reports.

Key Findings

The following captures key findings related to the learning strategy:

Question/Item Related to Topic	Strength	Area for Concern	Red Flag	Findings
Learning Events Deployed				
Learning Options				
Reinforcement Measures				
Post Learning Support				
Learning Results (by roles)	Learning Needs Addressed are:	Learning Needs Not Addressed are:		
Learning Agents				

Sample of Representative Comments

The following captures comments representative of the findings described above:

-
-
-

Recommendations

The following captures key recommendations and associated actions related to the learning strategy:

Recommendations	Priority (1,2,3 where 1 is high)	Degree of difficulty (1-10 where 1 is easy)	Action	Accountability Assigned to	Measures and Milestones	Time Frame

Detailed Findings

Review of Learner Groups

The following grid represents a high-level listing of management and non-management learners:

NON-MANAGEMENT LEARNERS IN EACH DEPARTMENT				
Department	Number	Location	Shift	Educational Background
MANAGEMENT LEARNERS AND OTHERS				
Department/ Organization	Number	Location	Shift	Position
				Business unit managers
				Middle managers
				First-line managers
				Project team Members
				Suppliers
				Customers
ADDITIONAL LEARNERS REQUIRING TRAINING				
Department/ Organization	Number	Location	Shift	Position

User Profiles

These following profiles by roles show the gaps in current and needed KSA (knowledge, skills, aptitudes) in the areas of systems literacy, procedural skills, and business skills

User Group:		
Knowledge, Skills & Aptitudes (KSA) Area	Required	Demonstrated
Systems Literacy		
• ..		
• ..		
• ..		

User Group:		
Knowledge, Skills & Aptitudes (KSA) Area	Required	Demonstrated
Procedural skills		
• ..		
• ..		
• ..		
Business skills		
• ..		
• ..		
• ..		

Learning Options Favored

The following learning options have been used in the implementation. In conclusion, we plan to....

Option	Participants' Reaction: - Positive, Neutral, Negative	Managers' Evaluation - Effective, Ineffective, Don't Know	Barriers to this option?
Instructor led			
Computer Based Learning			
Web-Based			
Mentoring/Coaching			
Desk Manuals			
Learning Labs			
Job Aids			
Videos or other media-based learning			

Learning Content

The perceived additional needs are captured below by target population. In conclusion, we plan to ...

TARGET POPULATION: _____		
Knowledge, Skills & Aptitudes(KSA) Area	Required	Needing Additional Learning
Systems literacy:		
• ...		
• ...		
• ...		
Procedural skills		
• ...		
• ...		
• ...		

TARGET POPULATION: _____		
Knowledge, Skills & Aptitudes(KSA) Area	Required	Needing Additional Learning
Business skills		
• ...		
• ...		
• ...		

Learning Reinforcement

The following describe the approach favored to reinforce learning during the implementation. In conclusion, we plan to...

Question/Item Related to Topic	Findings
Reinforcement mechanisms, media, and methods	•
Rewards and recognition programs	•
Process to transfer learning to workplace, for example, help desk, local specialists, quick and easy reference aids, learning agents available for a period of time after initial rollout, on-line help, ...	•

Learning Measurement

The following describes the approach favored to continue measuring learning effectiveness: In conclusion, we plan to....

Measurements	Currently in Place	Desired in Future	Estimated Cost to Implement
Learner Reaction (Did you like the learning event?)			
Self-Assessment of Learning (Can you perform the skills you learned?)			
Relevance to Performance (Can you use in the workplace the skills you learned?)			

Measurements	Currently in Place	Desired in Future	Estimated Cost to Implement
Use of control group			
Learner Verification			
Business Results (Have the employees' new skills improved business performance?)			

Learning Culture

The following values were displayed towards learning during the implementation:
In conclusion, we plan to ...

Question/Item Related to Topic	Very Positive	Positive	Negative	Very Negative
Users' attitude toward learning				
Users' commitment to attend learning events				
Managers' willingness to send people to learning events				

Learning Agents

The following people have been identified as additional members for the learning team: In conclusion, we plan to....

Name	Position/Title	Location	% of Time Available	Recommended by:	Qualifications

Open and Closed Issues for this Deliverable

Appendix B - Interview, Focus Groups and Survey Questions per Group of Respondents

This Appendix includes the following sections:

Section	Description
Executive Insights Interview Questions	Interview Guide for interviews with vendor sales representative and top executives.
Functional Managers' Insights Interview Questions	Interview Guide for interviews with VPs/Directors, middle managers and 1 st line managers
User Insights Interview Questions	Interview Guide for interviews with users.
Learning Subject Matter Specialist (SMS) Insights Interview Questions	Interview Guide for interviews with Learning Subject Matter Specialist (SMS).
Focus Group Questions	Facilitation Guide for interview with focus group.
Bank of Questions for Organizational Effectiveness Survey	List of questions to use in the readiness survey administered to a sample of stakeholders.
Communication	Sample of Interview Announcement

Executive Insights Interview Questions

Executives were asked the following questions:

Executive Stakeholder Interview Guide

Executive Stakeholders include the Chief Executive Officer (CEO), Chief Operations Officer (COO), Chief Financial Officer (CFO), Chief Information Officer (CIO) and other high level executives from impacted business units.

1. What results have you observed from the implementation? How close are they to your expectations?
2. How successfully has the organization managed the technology-induced change? How is the organization absorbing the business and cultural change resulting from the implementation?
3. What organizational and people strategies were most successful? Least successful?
4. What organizational and people strategies deployed in the implementation can help the organization continue to improve?
5. Where do you see the next organizational challenges?
6. What is your vision for the future of the organization?
7. What do you see as leverage points for continuous improvement?
8. What do you see as major obstacles for organizational performance?
9. How are customers reacting to the organizational performance (for example, better customer service)?
10. Do you have the resources and skills necessary to dedicate to continuous improvement?

11. What role do you expect your leaders to play in the continuous improvement program?

Functional Managers' Insights Interview Questions

Functional managers were asked the following questions:

Interview Guide for VPs/Director levels

1. How is your business unit performing now? Are you meeting the performance expectations?
2. How successfully has the organization managed the technology-induced change? How is the organization absorbing the business and cultural change resulting from the implementation?
3. What organizational and people strategies were most successful? Least successful?
4. What tools support your performance indicators? Are rewards systems appropriately tied to the performance indicators?
5. How are your managers held accountable to meet the new performance objectives?
6. What are the corrective measures in place when performance expectations are not met? What are the rewards when performance expectations are met or exceeded?
7. What are your strongest areas of performance? For example, productivity (quality and quantity), customer service, ...
8. How much decision-making authority goes down to the end user levels? How do you empower your people from the top down? Can you give me examples where people actually used the power delegated to them?
9. What types of information do you share with your direct reports? How do you communicate up and down the organization? How do you get meaningful feedback?
10. What organizational and people strategies deployed in the implementation can help the organization continue to improve?
11. Where do you see the next organizational challenges?
12. What is your vision for the future of your business unit?
13. What do you see as leverage points for continuous improvement?
14. What do you see as major obstacles for organizational performance?
15. How are customers reacting to the organizational performance (for example, better customer service)?

Interview Guide for Middle Managers

1. How have the applications helped you improve the performance of your department? Discuss your business goals and how these applications are serving these goals.
2. How successfully has the department managed the technology-induced change? How is the organization absorbing the business and cultural change resulting from the implementation?

3. How effective are your new workflows? New roles? Which process(es) still need improvement?
4. What organizational and people strategies were most successful? Least successful?
5. What tools support your performance indicators? Are rewards systems appropriately tied to the performance indicators?
6. What are your strongest areas of performance? For example, productivity (quality and quantity), customer service, ...
7. What types of information do you share with your direct reports? How do you communicate up and down the organization? How do you get meaningful feedback?
8. What organizational and people strategies deployed in the implementation can help the organization continue to improve?
9. Where do you see the next organizational challenges?
10. What is your vision for the future of your department?
11. What do you see as leverage points for continuous improvement?
12. What do you see as major obstacles for organizational performance?
13. How are customers reacting to the organizational performance (for example, better customer service)?
14. How are your supervisors held accountable to meet performance objectives? How are they rewarded if they meet or exceed them? What measures are in place if they do not meet the performance objectives?
15. How do you empower your people from the top down? Can you give me examples where people actually used the power delegated to them.
16. What behaviors are encouraged in your department? How?
17. What is the union's involvement in decisions about the performance measures?
18. How does your organization support teamwork? How do you support teamwork?
19. What are the rewards system in place? What do they reward? What feedback do you get from employees on the reward systems?
20. What are the challenges or barriers to performing your job as a manager?
21. Do you have a clear picture of the additional knowledge, skills and aptitudes you want to see in your performers (performance goals)? What additional changes in the KSAs (Knowledge, Skills and Aptitudes) will give you the most benefit? What percentage of the audience already have them?
22. What motivation or incentives currently exist? Do employees' possess the necessary morale and attitude to perform effectively?

Interview Guide for 1st Line Managers

1. How have the applications helped you improve the performance of your team? Discuss your business goals and how these applications are serving these goals.

2. How successfully has the team managed the technology-induced change? How is the organization absorbing the business and cultural change resulting from the implementation?
3. How effective are your new workflows? New roles? Which process(es) still need improvement?
4. What organizational and people strategies were most successful? Least successful?
5. What tools support your performance indicators? Are rewards systems appropriately tied to the performance indicators?
6. What are your strongest areas of performance? For example, productivity (quality and quantity), customer service, ...
7. What types of information do you share with your direct reports? How do you communicate up and down the organization? How do you get meaningful feedback?
8. What organizational and people strategies deployed in the implementation can help the organization continue to improve?
9. Where do you see the next organizational challenges?
10. What is your vision for the future of your team?
11. What do you see as leverage points for continuous improvement?
12. What do you see as major obstacles for organizational performance?
13. How are customers reacting to the organizational performance (for example, better customer service)?
14. What behaviors are encouraged in your team? How?
15. How does your organization support teamwork? How do you support teamwork?
16. What are the rewards system in place? What do they reward? What feedback do you get from employees on the reward systems?
17. What are the challenges or barriers to performing your job as a manager?
18. Did you have a difficult time gaining end users' commitment to attend learning events?
19. What learning have your employees received? What has been their response? How well was it received? Are they able to perform now? Why or why not?
20. When someone has a problem with existing systems, what/who do they turn to for help?
21. How many individuals/roles require additional learning? What do you think their learning needs are?
22. Do you have a clear picture of the additional knowledge, skills and aptitudes you want to see in your performers (performance goals)? What additional changes in the KSAs (Knowledge, Skills and Aptitudes) will give you the most benefit? What percentage of the audience already have them?
23. What motivation or incentives currently exist? Do employees' possess the necessary morale and attitude to perform effectively?
24. What motivation or incentives currently exist? Do employees' possess the necessary morale and attitude to perform effectively?

25. How effective are the new job descriptions and/or competencies?
Do they accurately reflect what people need to do?

User Insights Interview Questions

Users were asked the following questions:

Interview Guide for End Users

1. How comfortable are you in your new role? How helpful are the applications to improving the performance of your team? What barriers do you have to overcome in your daily responsibilities?
2. How effective are your new workflows? New roles? Which process(es) still need improvement?
3. What organizational and people strategies deployed in the implementation can help the organization continue to improve?
4. Where do you see the next organizational challenges?
5. What do you see as leverage points for continuous improvement?
6. What do you see as major obstacles for organizational performance?
7. What behaviors are encouraged in your team? How?
8. How does your organization support teamwork? How do you support teamwork?
9. What are the rewards system in place? What do they reward? What feedback do you get from employees on the reward systems?
10. What are the challenges or barriers to performing your job?
11. What learning did you receive? How useful was that learning?
12. When you have a problem with existing systems, what/who do you turn to for help?
13. What additional learning would you like to receive?
14. How effective are the new job descriptions and/or competencies? Do they accurately reflect what you need to do?
15. How does your supervisor encourage you to learn and improve your capabilities?
16. What do you know about the goals and objectives of the organization, department, group, self?
17. What can the organization do to improve the work environment?
18. How does the organization foster collaborative/competitive relationships? How does your manager? How do your colleagues?
19. How does the organization foster customer (internal and external) service?
20. How much professional contact do you have with other groups?
21. What information does your supervisor share with you? How?
22. When you have a question/problem on the job, who do you ask? Supervisor, colleague, outside source?
23. How do you get/give information effectively?

24. What happens if an employee does not meet the performance objectives? What are the corrective measure in place when performance expectations are not met?
25. To what extent are the employees listened to when making improvement suggestions in the way they do their job?

Learning Subject Matter Specialist (SMS) Insights Interview Questions

Learning subject matter specialists were asked the following questions:

1. How effective has the learning been? Why? Why not?
2. What has been the learners' response? How well was it received?
3. How are users able to perform now?
4. What skills, knowledge and aptitudes do you observe among the target learners?
5. What change in the knowledge, skills and aptitudes are giving you the most benefit?
6. What additional learning needs do you see?

Learning Needs Analysis Interview Guide

1. In view of your new role and the competencies associated with it, what is the gap between where you are now and where you need to be in the following areas:
 - Systems literacy
 - Procedural skills, including managing to the new roles and performance expectations
 - Business skills
2. Think of the different roles which will exist within your group, what are they?
3. By role, let's discuss the gap between where the users of the new system are and where they need to be in terms of their systems literacy, procedural and business skills.
4. What suggestions do you have to bridge the gap? What kinds of learning do you think would work well?
5. What plans do you have for helping employees reinforce their learning and transfer their skills to the workplace after they have been skilled?
6. How do you plan on measuring the impact of employees' skills and behaviors on your work group's success?

Focus Group Facilitation Guide

The following questions were asked of participants in the focus group sessions:

-
-
-

Bank of Questions for Organizational Effectiveness Survey

Instructions: The following items ask you a variety of questions about your organization in general and how it conducts itself. For each of these items, please indicate the extent to which you agree or disagree with the statement by circling the number that most closely corresponds to your opinion. If a question is not applicable, or you are unsure how to respond, please rate that item as “neutral.” Thank you for taking the time to fully complete this survey.

People

1. This company cares about people.
2. I am a valued member of my team.
3. I am treated with respect.
4. I'd recommend this company as a good place to work.
5. Leaders in this company walk the talk.
6. This company provides me with opportunities for growing my career.
7. I am given the opportunities to learn new things.
8. I have a feeling of personal responsibility for the success of this company.
9. I have the skills I need to do my job.
10. I can count on my leader to tell the truth.
11. My leader gives me candid feedback.
12. I get prompt feedback on my performance.
13. I have worked with my leader to create a career plan.
14. I have enough time to learn new things.

Organizational Culture

1. This company rewards the pioneers.
2. People are recognized for creative ideas.
3. Customers view us as being responsive to their needs.
4. We have set challenging goals for customer satisfaction.
5. We closely monitor the competition.
6. We work well across organizational boundaries.
7. The atmosphere here is relaxed and friendly.
8. We focus on solving problems rather than placing blame.
9. I am encouraged to express my ideas.
10. I get timely information.

11. We have effective processes for resolving conflict.
12. We seldom feel anxiety because we don't know what is going on.

Organizational Structure

1. In this company decisions are made at the right level.
2. Our reward system supports the behaviors which will help our company become more competitive.
3. It isn't difficult to get a decision made.
4. In the company, promotion is based on merit.
5. I am compensated fairly for the work I do.
6. I know the standards by which my performance is judged.
7. My performance appraisals are conducted in a timely manner.
8. We have good processes in place to help new people become integrated.
9. We change policies and procedures which no longer support our goals.
10. This company has very little red tape.

Work

1. I know how the work I do fits with the work done by other groups.
2. I have been trained to use the tools available to me.
3. My job has clearly defined goals.
4. Work is distributed equitably in my group.
5. There has been a steady decline in the amount of rework done by my group in the last six months.
6. We are using the full functionality of the technology.

Physical Setting

1. We have satisfactory working conditions.
2. This organization is concerned about the safety of its employees.
3. Leaders are ethical in their dealings with customers.

Communication: Sample of Interview Announcement

Below is a sample of an interview announcement.

Dear <Name of the interviewee>,

You have been selected by <xxx> as a key source of input regarding the opportunity for our organization to continue to improve. Thank you for agreeing to be interviewed. The information you contribute will feed into the planning which lay the foundation for our successful performance. Your interview has been scheduled for <date> at <time> in <location>. <Name of the interviewer>, the <title>, will be conducting your interview.

The interview will last approximately one hour. Your responses will be used in several ways: chiefly, the information you give will allow us to formulate tailored recommendations for the

June 8, 1999

organization. With your permission, we will share your responses to some of the questions with the rest of the <executive> team on an <anonymous> basis. <Name of the interviewer> will take notes during the interview, and you will have the opportunity to review the notes and make any changes you feel are appropriate before anyone else sees them. The notes will be consolidated into our Effectiveness Assessment deliverable; this roadmap will identify the steps required in your organization to continue to improve and achieve performance goals.

You'll find a copy of the interview guide attached to this <memo>. If you have any questions about the process, <name of the interviewer> can be contacted at <phone number or email>.

Appendix C - Consolidated Insights per Group of Respondents

This Appendix includes the following sections:

Section	Description
Interviewee Profile	FOR PROJECT TEAM INTERNAL USE ONLY: matrix to capture interviewees' key dispositions and issues regarding the project
Consolidation of Insights	Grid to capture main topics from interviews.

Interview Profile (for project team internal use only)

This document consolidates key dispositions and issues regarding the continuous improvement program.

Name/Role	Disposition: Pro, Con, Neutral, Indifferent	Required Disposition (Note minimum critical stance)	Key Issues and Concerns	Influence: High, Medium, Low...	Date last updated
