<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define your Kanban Pull Sequences.

Kanban is a means of supporting pull-based replenishment in manufacturing systems. A Kanban system is a self-regulating pull system that leads to shorter lead times and reduced inventory. Kanban systems are typically applied to items that have relatively constant demand and medium-to-high production volume.
