Reports, Exceptions, and Workbench Setup	MRP: Run Audit Information Report					
Reports, Exceptions, and Workbench Setup	MRP: Define Planning Exception Parameters					
Project Planning Parameters	MRP: Define Planning Groups					

Initial MRP Setup /MRP: Define Planners

 Inventory>Setup>Planners

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define and update material Planners or planning entities.

 **Attention:** A planner can be a person or an entity, such as a department or a division

<Planners>

Planner Name	Description	Employee Code	Email Address	Inactive Date

Initial MRP Setup/MRP: Define Planning Parameters

Planning>Setup>Parameters

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this region to define and update the execution default Parameters for Oracle Master Scheduling/MRP.

<Planning Parameters>

Snapshot Lock Tables		Default ABC Assignment Group	
Execution Defaults:			
Demand Time Fence Control		Planning Time Fence Control	
Plan Safety Stock		Net WIP	
Net Purchases		Net Reservations	
Material Scheduling Method:			
Planned Item			
Include MDS Days			

<Repetitive Planning Parameters>

Use:		Anchor Date:	
First Bucket Days		First Horizon	
Second Bucket Days		Second Horizon	

Third Bucket Days			
-------------------	--	--	--

Initial MRP Setup/MRP: Start the Planning Manager

Planning>Setup>Planning Manager

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to start the concurrent manager named the Planning Manager. One of the main jobs of the Planning Manager is to keep the MTL_DEMAND table updated.

Initial MRP Setup/MRP: Define Exception Sets

Planning>Setup>Exception Set

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this region to define or update the Planning Exception sets for Oracle Master Scheduling/MRP.

<Planning Exception Sets>

Name:	
Sensitivity Controls:	
Excess Quantity	
Repetitive Variance	
Over Utilized	
Under Utilized	
User Defined TF (Days)	
Exception Time Periods:	
Shortage Exceptions	
Excess Exceptions	
Resource Over Utilized	
Resource Under Utilized	
Overpromised Exceptions	
Repetitive Variance Exceptions	

MRP: Define Demand Classes

 Planning>Setup>Demand Class

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish Quick Codes for Demand Classes. Demand Classes are Marketing channels that can be used for forecasting and planning. This is a QuickCode form and should come seeded with Demand Class type.

<Demand Classes>

Code	Meaning	Description	Start Date	End Date	Enabled?

Product Family Setup/MRP: Setup - Product Families

Setup>Product Families

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the members of Product Families and their allocation percent of forecasts. Product Families are defined in INV: Master Items with an Item Type and BOM Type = Product Family.

<Product Family>

Product Family Item	Description	Member Item	Description	Planning %	Effective From	Effective To	Inactive On

MRP: Define Forecast Sets

 Planning>Forecasts>Sets

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish independent Forecast demand. Sets comprise of Forecast Names, which comprise of the Items forecasted and their detailed Forecast entries.

<Forecast Sets>

Set Name	Set Description	Bucket Type	Default Level	Inactive On	Consume	Outliner %	Forward Days	Backward Days

<Forecast Names>

F/C Name	F/C Description	Inactive On	Demand Class	Customer

<Forecast Items>

<Entries>

F/C Name	F/C Description	Item Number	Level	Start Date	End Date	Current Qty	Production Line	Project/Task

F/C Name	F/C Description	Item Number	Level	Start Date	End Date	Current Qty	Production Line	Project/Task

MDS, MPS, and MRP Names Setup/MRP: Define Names - MDS

 Planning>MDS>Names

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define Master Demand Schedule Names. A MDS is a statement of shipments and can be loaded from Sales Orders, Forecasts, Inter-org transfers, or spares entries.

<Master Demand Schedule Plan Name>

Name	Description	Demand Class	Relief	Inactive On

MDS, MPS, and MRP Names Setup/MRP: Define Names - MPS

Planning>MPS>Names

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define Master Production Plan Names for both Production Schedules and Simulation plans.

<Master Production Plan>

Name	Description	Demand Class	Relief	Inventory ATP	Production	Inactive On

MDS, MPS, and MRP Names Setup/MRP: Define Names - MRP

Planning>MRP>Names

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the Names for Material Requirement Plans.

<Material Requirements Plan>

Name	Description	Feedback	Production	Inactive On

Kanban Names Setup/Kanban: Define Names

Planning>Kanban>Names

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the Names for Kanban plans. Kanbans are defined in INV: Master Items with Release field set to Kanban. A Pull Sequence is defined to replenish Kanban Locations and establish order modifiers. A Kanban plan will calculate kanban lot sizes per location based on Demand Type and Demand horizon. Pull Sequences are established in either Inventory or Flow Manufacturing responsibilities.

<Kanban Plan Names>

Name	Description	Demand Type	Forecast/Schedule	Inactive On

MPS, MRP, and DRP Options Setup/MRP: Define Options - MPS

Planning>MPS>Options

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the processing Options for Master Production Schedules.

<Plan Options>

Plan		(Plan) Type	
MDS Schedule		(Schedule) Type	
Overwrite			
Append Planned Orders		Snapshot Lock Tables	
Demand Time Fence Control		Planning Time Fence Control	
Net WIP		Net Purchases	
Net Reservations		Plan Safety Stock	
Material Scheduling Method			
Planned Items			
Pegging:			
Pegging (Yes)			
Reservation Level			
Hard Pegging Level			

button

Subinventory Netting

<Subinventory Netng>

Name	Description	Net

MPS, MRP Options Setup/MRP: Define Options-MRP

Planning>MRP>Options

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the processing Options for Material Requirement Plans.

<Plan Options>

Plan		(Plan) Type	
MDS / MPS Schedule		(Schedule) Type	
Overwrite			
Append Planned Orders		Snapshot Lock Tables	
Demand Time Fence Control		Planning Time Fence Control	
Net WIP		Net Purchases	
Net Reservations		Plan Safety Stock	
Plan Capacity			
Bill of Resource			
Simulation Set			
Pegging:			
Pegging (Yes)			
Reservation Level			
Hard Pegging Level			

Material Scheduling Method			
Planned Items			

button

Subinventory Netting

<Subinventory Netng>

Name	Description	Net

Reports, Exceptions, and Workbench Setup/MRP: Run Audit Information Report

Planning>Reports>SRS

<Customer Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to run the Audit Information Report and verify planning data.
