Introduction

Purpose

This Installed Conversion Programs Document describes the installation of the conversion programs and/or automated conversion tools in the Production Environment.

Audience

The primary audience for this document is as follows:

-
-
-

Production Environment

Below is a description of the production environment in which the conversion will take place.

Hardware	<Hardware Platform>
Operating System	<Operating System and Version>
Oracle RDBMS version	<Oracle RDBMS Version>
Oracle Applications	Release <Target Applications Release>

Installed Oracle Applications:

-
-
-

Directory Structure

All modules are installed as if part of a separate product. A directory structure is created under \$APPL_TOP as follows:

The directories contain the components of the enhancement as shown below (directories not listed are empty). All future customizations will also be stored in these directories.

```

forms/
  <Form Name>
bin/
src/
sql/
srw/
install/sql/
  
```

The forms and concurrent programs are registered in Application Object Library under the <Application Short Name> application.

A new set of menus (owned by <Application Short Name>) is created to call the new forms as follows:

```

Navigate
  Sub-menu
    Sub-menu
  
```

Installation Procedures Checklist

This section lists the installation steps for the conversion automated tools software and the conversion programs.

Seq #	Installation Step	Complete?

Conversion Programs

This worksheet records the file structure of the conversion program for each business object that is being converted to the target production environment.

Conversion Programs	Program Name	File Structure/Location
<Business Object>		
Download Program		
Interface Table Creation Program		
Upload Program		
Translation Program		
Interface/Validation Program		
<Business Object>		
Download Program		
Interface Table Creation Program
