Introduction

Purpose

This document records the conversion and verification of <Business Object To Be Converted> in the Production Environment.

Audience

The primary audience for this document is as follows:

-
-
-

Century Date Compliance

In the past, two character date coding was an acceptable convention due to perceived costs associated with the additional disk and memory storage requirements of full four character date encoding. As the year 2000 approached, it became evident that a full four character coding scheme was more appropriate.

In the context of the Application Implementation Method (AIM), the convention Century Date or C/Date support rather than Year2000 or Y2K support is used. Coding for any future Century Date is now considered the modern business and technical convention.

Every applications implementation team needs to consider the impact of the century date on their implementation project. As part of the implementation effort, all customizations, legacy data conversions, and custom interfaces need to be reviewed for Century Date compliance.

Download Programs

The following table records for the conversion of <Business Object To Be Converted>:

- each download program executed and verified
- resulting ASCII flatfile extract created

Sequence	Program Name	Description/Purpose	Program Location	Executed by:	Date:	Verified By:	Date:	ASCII Flatfile: File Name and Location	Results/Comments

Interface Table Creation Programs

The following table records the results of each interface table creation program executed and verified for the conversion of <Business Object To Be Converted>.

Sequence	Program Name	Description/Purpose	Instance	Created By:	Date:	Verified by:	Date:	Comments

Upload Programs

The following table records the results of the execution of each upload program executed and verified for the conversion of <Business Object To Be Converted>.

Sequence	Program Name	Description/Purpose	Program Location	Executed By:	Date:	Verified By:	Date:	Comments

Translation Programs

The following table records the results of each translation program executed and verified for the conversion of <Business Object To Be Converted>.

Sequence	Program Name	Description/Purpose	Program Location	Executed By:	Date:	Verified by:	Date:	Results/Comments

Interface/Validation Programs

The following table records each interface program executed and verified for the conversion of
<Business Object To Be Converted>.

Sequence	Program Name	Description/Purpose	Program Location	Executed By:	Date:	Verified by:	Date:	Results/Comments
