Introduction

Purpose

The purpose of **Performance Test Scripts** is to describe the steps needed to execute the individual transactions included in the <Project Name> performance test.

The scenarios for the performance test are documented in the Performance Test Scenarios documents. The scenarios decomposed into separate test transaction models, each of which corresponds to the execution of the test scenario using a different set of test parameters. This deliverable takes the decomposed transaction models for <Subject> and breaks them down into a further level of detail, specifying the steps within each transaction that will make up a transaction model. The results of this break down is a series of test scripts for execution by the developer of the test transaction programs, or by the users involved in the performance test.

Test Scripts

This section includes decomposition of the performance test transactions into a sequence of transactions, inquiries and events in specific forms and reports of applications modules.

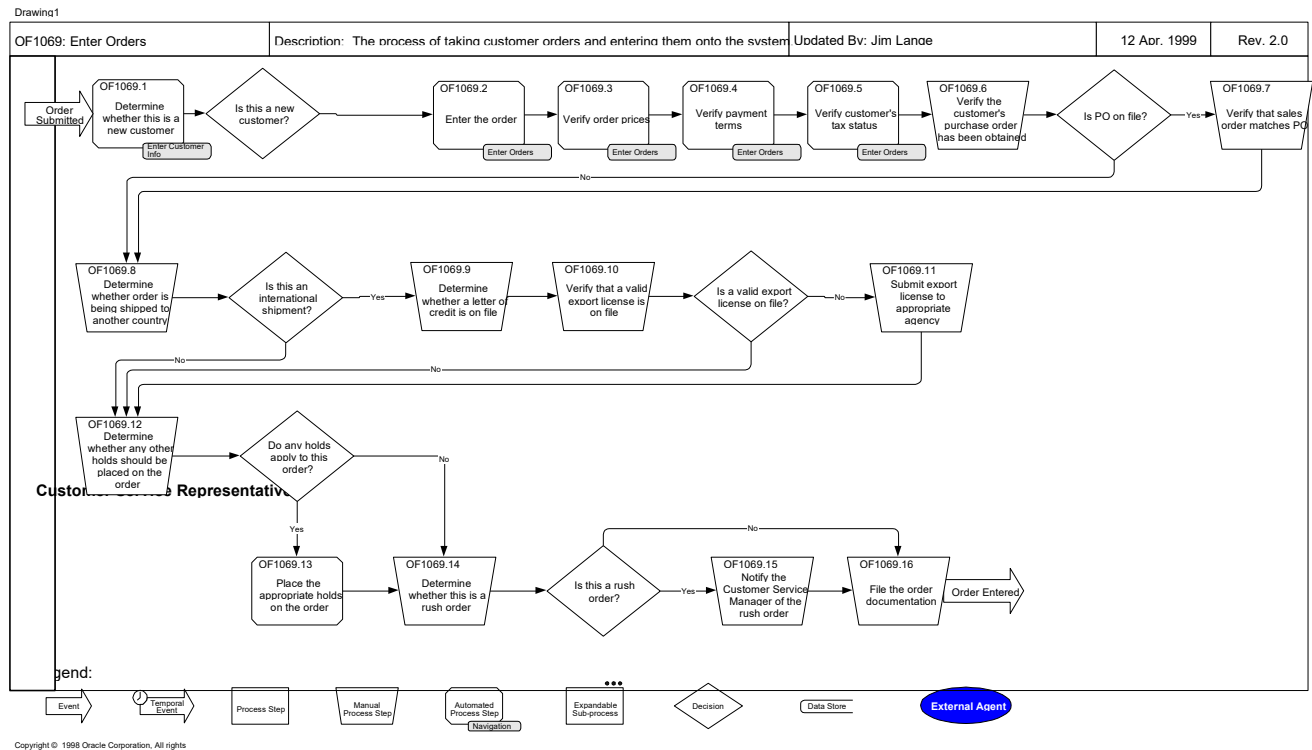

Test Scenario 1 - <Performance Test Scenario Name>

Script Code: <Test Script Code>

Transaction Model(s) covered by this test: <Transaction Model Name>

Test Business Function	Process ID	Action	Application	Module	Seq.
Order Entry	OF1069.2	Enter order header in Order zone (in booked state)	Oracle OE	Enter Orders	1
	OF1069.2	Navigate to Additional Order Information region (next zone)		Enter Orders	2
	OF1069.2	Enter further order header details		Enter Orders	3

Order Entry Transaction Flow Diagram

Test Script Response Measurements

This section details the measurement of performance test script responses. We capture these measurements during the course of the execution of the script. Measurements taken follow...

Test Scenario 1 - <Performance Test Scenario Name>

Script Code: <Test Script Code>

Transaction Model(s) covered by this test: <Transaction Model Name>

Test Business Function	Action	Measurement Code	Measurement
Order Entry	Select customer in order header of Enter Orders		Time to validate customer name from fully typed value
	Commit order header in Enter Orders		Time to commit completed order header

Assumptions

<Describe the assumptions made in creating the test scripts or in defining the measurements to be made during the execution of the test script>
