Application Set Up Control Sheet - Supply Chain Planning 1 of 28

Company Confidential - For internal use only

SubWorkflow Name	Set Up	Responsibility	Due Date	QA Responsibility	QA Due Date	Signature Approval
and In-Transit Setup						
Shipping Network, Methods, and In-Transit Setup	SCP: Define Shipping Methods					
Shipping Network, Methods, and In-Transit Setup	SCP: Define Planning Group					
Shipping Network, Methods, and In-Transit Setup	SCP: Define In-Transit Lead Time					
Manager, Seiban, and Project Setup	SCP: Start Planning Manager					
Manager, Seiban, and Project Setup	SCP: Define Seiban Numbers					
Manager, Seiban, and Project Setup	SCP: Define Project Parameters					

Parameters, Exception Sets, and Demands Setup/SCP: Define Planning Parameters

Planning>Setup>Parameters

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this region to define and update the execution default Parameters for Oracle Supply Chain Planning.

<Planning Parameters>

Snapshot Lock Tables		Default ABC Assignment Group	
Execution Defaults:			
Demand Time Fence Control		Planning Time Fence Control	
Plan Safety Stock		Net WIP	
Net Purchases		Net Reservations	
Material Scheduling Method:			
Planned Item			
Include MDS Days			
Repetitive Planning Parameters:			
Use:		Anchor Date:	
First Bucket Days		First Horizon	
Second Bucket Days		Second Horizon	

<Subject>

Third Bucket Days			
-------------------	--	--	--

Parameters, Exception Sets, and Demands Setup/SCP: Define Demand Classes

Planning>Setup>Demand Class

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish QuickCodes for Demand Classes. Demand Classes are Marketing channels that can be used for forecasting and planning. This is a QuickCode form and should come seeded with Demand Class type.

<Demand Classes>

Code	Meaning	Description	Start Date	End Date	Enabled?

Parameters, Exception Sets, and Demands Setup/SCP: Define Exception Sets

Planning>Setup>Exception Set

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this region to define or update the Planning Exception Sets for Oracle Master Scheduling/MRP.

<Planning Exception Sets>

Name:	
Sensitivity Controls:	
Excess Quantity	
Repetitive Variance	
Over Utilized	
Under Utilized	
User Defined TF (Days)	
Exception Time Periods:	
Shortage Exceptions	
Excess Exceptions	
Resource Over Utilized	
Resource Under Utilized	
Overpromised Exceptions	
Repetitive Variance Exceptions	

Product Family Setup/SCP: Setup - Product Families

Setup>Product Families

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the members of Product Families and their allocation percent of forecasts. Product Families are defined in INV: Master Items with a Item Type and BOM Type = Product Family.

<Product Family>

Product Family Item	Description	Member Item	Description	Planning %	Effective From	Effective To	Inactive On

Setup/SCP: Define Forecast Sets

Planning>Forecasts>Sets

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish independent Forecast demand. Sets comprise of Forecast Names, which comprise of the Items forecasted and their detailed forecast entries.

<Forecast Sets>

Set Name	Set Description	Bucket Type	Default Level	Inactive On	Consume	Outliner %	Forward Days	Backward Days

<Forecast Names>

F/C Name	F/C Description	Inactive On	Demand Class	Customer

<Forecast Items>

<Entries>

F/C Name	F/C Description	Item Number	Level	Start Date	End Date	Current Quality	Production Line	Project/Task

--	--	--	--	--	--	--	--	--

Planning Options Setup/SCP: Define MDS Names

Planning>MDS>Names

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define Master Demand Schedule Names. A MDS is a statement of shipments and can be loaded from Sales Orders, Forecasts, Inter-organization transfers or spares entries.

<Master Demand Schedule Plan Name>

Name	Description	Demand Class	Relief	Inactive On

Planning Options Setup/SCP: Define MPS Names

Planning>MPS>Names

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define Master Production Plan Names, for both Production Schedules and Simulation plans.

<Master Production Plan>

Name	Description	Organization Selection	Demand Class	Relief	Inventory ATP	Production	Inactive On

Planning Options Setup/SCP: Define DRP Names

Planning>DRP>Names

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the Names for Distribution Requirement Plans.

<Distribution Requirements Plan>

Name	Description	Organization Selection	Feedback	Production	Inactive On

Planning Options Setup/SCP: Define MRP Names

Planning>MRP>Names

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the Names for Material Requirement Plans.

<Material Requirements Plan>

Name	Description	Organization Selection	Feedback	Production	Inactive On

Planning Options Setup/SCP: Define Options - MPS

Planning>MRP>Options

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to the processing Options for Master Production Schedules.

<Plan Options 1>

Plan		(Plan) Type	
Assignment Set Name			
Overwrite			
Append Planned Orders		Snapshot Lock Tables	
Demand Time Fence Control		Planning Time Fence Control	
Plan Capacity?			
Pegging:			
Pegging (Yes)			
Reservation Level			
Hard Pegging Level			
Material Scheduling Method			
Planned Items			

<Plan Options 2>

Org(s) to include in Plan	Net WIP	Net Reservations	Net Purchasing	Plan Safety Stock	Bill of Resources	Simulation Set	Demand Schedule Name	Supply Schedule Name

button

SubInventory Netting
<SubInventory Netting>

Name	Description	Net

Planning Options Setup/SCP: Define Options - MRP

Planning>MRP>Options

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the plan Options for Multi-org (optional) Material Requirements Planning

<Plan Options 1>

Plan		(Plan) Type	
Assignment Set Name			
Overwrite			
Append Planned Orders		Snapshot Lock Tables	
Demand Time Fence Control		Planning Time Fence Control	
Plan Capacity?			
Pegging:			
Pegging (Yes)

<SubInventory Netting>

Name	Description	Net

SCP: Define Options - DRP

Planning>DRP>Options

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define the plan Options for the Distribution Requirements Plan

<Plan Options 1>

Plan		(Plan) Type	
Assignment Set Name			
Overwrite			
Append Planned Orders		Snapshot Lock Tables	
Demand Time Fence Control		Planning Time Fence Control	
Plan Capacity?			
Pegging:			
Pegging (Yes)			
Reservation Level			
Hard Pegging Level			
Material Scheduling Method			
Planned Items			

<Plan Options 2>

Org(s) to include in Plan	Net WIP	Net Reservations	Net Purchasing	Plan Safety Stock	Bill of Resources	Simulation Set	Demand Schedule Name	Supply Schedule Name

button

SubInventory Netting

<SubInventory Netting>

Name	Description	Net

Sourcing Rules Setup/SCP: Define Bills of Distribution

Planning>Sourcing>Bills of Distribution

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define replenishment Sourcing for multiple orgs at once, using the Bill of Distribution.

BOD Name	Description	Receiving Org	Effectivity Dates of Org in BOD	Shipping Org Type	Org	Supplier/Site	Allocation %	Rank	Shipping Method	Intransit Leadtime

Sourcing Rules Setup/SCP: Define Sourcing Rules

Planning>Sourcing>Sourcing Rules

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define replenishment Sourcing for ALL or one organization at a time.

SR Name	Description	Receiving Org or ALL Orgs	Effectivity Dates of Rule	Shipping Org Type	Org	Supplier/Site	Allocation %	Rank	Shipping Method	Intransit Leadtime

Sourcing Rules Setup/SCP: Define Assignment Sets

Planning>Sourcing>Assign BOD & Sourcing Rules to Assignment Set

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to assign Bills of Distribution and/or Sourcing Rules to Items in Orgs. This can be done via a hierarchy which can assign rules Globally (for example; all items in all orgs are sourced from the same), or very specifically for an item in an Org.

<Assignment>

Assignment Set Name	Description	Assignment Hierarchy	Org	Item or Category	SR or BOD?	SR or BOD Name

Shipping Networks, Methods, and In-Transit Setup/SCP: Define Shipping Methods

Planning>Setup>Ship Method

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish QuickCodes for Ship Methods. Ship Methods define the approved Ship Via codes for an organization.

<Ship Methods>

Code	Meaning	Description	Start Date	End Date	Enabled?

Shipping Networks, Methods, and In-Transit Setup/SCP: Define Shipping Network

Inventory>Setup>Organization>Shipping Network

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to define shipping networks between two inventory orgs. "Transfer From" replenishment types will not be allowed without first defining the Shipping Network between the two orgs.

* See Inventory BR110.

Shipping Networks, Methods, and In-Transit Setup/SCP: Define In-Transit Lead Time

Inventory>Setup>Organization>Shipping Network - Special Menu

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to add the approved shipping methods and their associated In-Transit Lead Times. Use the Shipping Network form noted above, select the Special Menu, then select Shipping Methods. Add approved shipping methods to be used to transfer product between orgs, then add the intransit leadtime for the transfer based on each shipping method.

* See Inventory BR110.

Manager Project Setup/SCP: Start Planning Manager

Planning>Setup>Planning Manager

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to start the Planning Manager Concurrent Manager.

Manager, Project Setup/SCP: Define Planning Group

Planning>Setup>Planning Group

<Company Short Name> Process: <Process Name>	Business Area: <Business Area>	Date: <Date>
Control Number: <Control Number>	Priority(H, M, L): <Priority (H, M, L)>	Process Owner: <Process Owner>

Description: Use this form to establish QuickCodes for Planning Groups. Planning Groups are used to group Project for the purpose of sharing demand and supply during Project MRP netting process. Plan Options must also be set appropriately for this to function as desired.

<Planning Groups>

Code	Meaning	Description	Start Date	End Date	Enabled?
