Overview

This document defines the custom database extensions required to meet the business needs of <Company Long Name>. The database extensions described in this document work in concert with custom modules.

Customizations

The customizations that support or require the database extensions in this document are:

<Customization Name>	<Description>
----------------------	---------------

Data Model

Logical Database Design

The logical database describes the tables, views, and other database objects that implement the business objects and entities depicted in the Data Model.

Database Diagram

Table List

<Table Name>	<Description>
--------------	---------------

View List

<View Name>	<Description>
-------------	---------------

Table and View Definitions

<Table Name>

Column Name	PK	Type	Size	Scale	Null Allowed?	Unique?	Default	Description

Foreign Keys:

Column Name	Foreign Key Table	Foreign Key Column	Check Condition

<View Name>

Source Tables:
Join Condition:

View Column	Source Table Column or Expression

Sequences

Required Grants and Synonyms

Index Design

<Index Name>

Table:

Type: <Unique/Non-Unique>

Column Name	Sequence

Physical Database Design

This section describes the destination username, tablespace, and table sizing parameters for each new table and index.

Object Name	Owner	Tablespace	Initial Extent	Next Extent	Percent Increase

Flexfield Design

Key Flexfields

<Business Object>

Base Table:

Segment Name	Prompt	Size	Value Set	Default Value

Descriptive Flexfields

Application:

Form Name:

Base Table:

Segment Name	Prompt	Size	Value Set	Default Value

Value Sets

Value Set	Size	Type	Rqd	Validation/Values
