Executive Summary

The <Project Team Name> has successfully transitioned to production. The overall investment was <Investment Total Dollars>. <Company Short Name> gained <Value Added Implementation Dollars> in value added implementation benefits.

Recognized business benefits gained through this process include:

-
-
-

This project is just the beginning of continual improvement projects, some system related and others business process oriented. To maintain the momentum of the project and to continue to deliver the benefits to the company, <Company Short Name> should set a future business direction.

The following sections provide an initial perspective on how to get <Company Short Name> directed toward strategically planning projects which support the company's future direction.

Future Business Direction

The future direction of the company includes:

-
-
-

Industry Trends

-
-
-

Strategy

Objectives

The objectives of the next project are:

-
-
-

Approach

The approach will be to:

- Evaluate the next level of requirements, medium to low level.
- Evaluate reengineering opportunities, defining high impact areas.
- Define and justify the next project, investment, and cost.
- Create a project team, leveraging Oracle expertise and partner relationships.

Time Frame

The targeted time frame for the next project is to ...

Next Steps

Evaluating Future Requirements

The project team should also go through a prioritization process while evaluating future requirements. We will analyze each requirement in terms of implementation and upgrade costs.

Some desired features may be in the next release of the Oracle Applications™. Before planning to add functionality, ensure that the project team thoroughly understands

what functionality will be part of the next release. At a minimum, <Company Short Name> project team should attend an overview class describing new features of Oracle Applications.

High-Impact Process Redesign

During this implementation many changes and improvements were made. The next phase should continue to look at high impact areas for additional redesign. High-impact redesign often delivers the greatest business benefit for the least amount of implementation cost.

The following are enhancements compiled throughout the project life cycle. They are to be considered for enhancements during the next phase of implementation.
